A few facts about our supply area.

Our supply area covers 834 sq km (322 sq miles), much of it rural.

Drinking water is supplied to around 270,000 properties and serves a population of approx 650,000 people.

On an average day we supply 160 megalitres/day (35 million gallons/day).

On a hot summers day this can rise to 260 megalitres/day (57 million gallons/day).

There are 9 treatment works, 39 service reservoirs or towers, 1 raw water reservoir, 40 pumping stations and 38 borehole sites many of which have more than one borehole.

There are 3,435 km (2134 miles) of mains.
